PROFESSIONAL SUMMARY

AI-native engineering leader and technical co-founder with 12+ years building and shipping enterprise, fintech, and AI-driven products. Currently co-founder at SociiLabs, leading a distributed team that shipped 8 products in one year using an AI-native SDLC framework of my own design. Built and led ADA, an agentic AI assistant for Albertsons, and founded Prophic AI, a pre-sales copilot for software agencies. Deep experience in software architecture, agentic AI/LLM systems, cloud infrastructure (GCP, AWS, Azure), and engineering leadership across distributed teams.

TECHNICAL SKILLS

- **Programming:** .NET, AngularJS, React, Angular 2+, Vue, Python, HTML, CSS, SCSS, jQuery, Node.js, Next, Nest, TypeScript
- **AI/LLM Engineering:** LangChain, LangGraph, Retrieval-Augmented Generation (RAG), Large Language Model Operations (LLMOps), Vector Databases, Multi-agent Systems, AI Agents, Prompt Engineering, Generative AI
- **Architecture:** Software Architecture, Microservices, Event-Driven Architecture, Agentic AI Architecture, Design Patterns, MVC, Repository Pattern, Entity Framework
- **Cloud & DevOps:** Google Cloud Platform (GCP), Microsoft Azure, Amazon Web Services (AWS), Docker, Terraform, CI/CD (GitHub Actions, Azure DevOps)
- **Integration & Data:** GraphQL, SOAP & REST Services, IBM MQ, RabbitMQ, MSMQ, SQL Server, Oracle, MongoDB, Firebase, Memcached
- **Native / Hybrid Mobile:** Ionic, Android Native, React Native
- **Testing & Version Control:** JEST, Jasmine, Selenium, Git (BitBucket, GitHub, GitLab), SVN, Team Foundation Server
- **Leadership & Delivery:** Technical Leadership, Engineering Management, Agile-Scrum, Client-Facing Delivery, Software Development Lifecycle (SDLC), Resource Planning & Talent Management, Code Review & Release Management

WORK EXPERIENCE

SOCIILABS

Co-Founder

Pakistan

01/2026 – Present

SociiLabs is an AI-native technology engineering studio delivering custom software and AI-driven products for distributed teams and clients.

- Co-founded and led engineering delivery for a 12-person distributed team that shipped **8 products in one year**, spanning venue booking, hospitality marketplace, and AI pre-sales tooling.
- Rebuilt Zapbook, a venue booking platform, from 5-year-old tech debt to a modern GCP-based system **in 63 days** with a 6-person team (9 releases, 300+ tasks closed), with zero downtime during migration.
- Built SociiOS, an internal AI-native SDLC framework connected to Claude, Cursor, and Slack, standardizing engineering and delivery standards across the organization.
- Founded and built Prophic AI, a pre-sales copilot that turns client briefs into priced, branded proposals in minutes; opened for beta on 08/2026 with 60+ registrants.
- Architected HELM, a two-sided hospitality-services marketplace, end-to-end — booking and pricing engine, payments/payouts, and role-based access.
- Serve as primary technical point of contact for internal and external clients, aligning engineering effort with business goals.

NISUM

Pakistan

Senior Technical Lead

04/2023 – 12/2025

Nisum is a global digital commerce and technology consulting firm serving enterprise retail, telecom, and e-commerce clients.

- Led development and go-live of ADA (Albertsons Digital Assistant), an in-house agentic AI assistant built on LangChain, LangGraph, vector databases, and an LLMOps pipeline, that reduced cross-team dependencies and intake by up to **80%** and cut resource onboarding time **from 4 weeks to 1**.
- Built an agentic actions framework enabling ADA to create JIRA stories, trigger deployment pipelines, and interact with external systems, **improving intake accuracy by 60%** for the Enterprise IoT team.
- Led a team migrating a legacy Flash-based event management application to Angular 12, including canvas-based seating layout tools built with KonvaJS.
- Led a team building a prototype AI-based e-commerce virtual assistant using OpenAI models, React, and Python Flask.
- Directed technical delivery of a .NET Core microservices platform with Angular and Ionic front ends for an enterprise collaboration system supporting local production and exports.
- Managed resource planning, client onboarding, code reviews, and release management across a diverse full-stack technology base (Angular, React, Node, .NET Core, Python).

NISUM

Pakistan

Country Client Lead

02/2022 – 12/2023

Parallel client delivery role covering resource planning, retention, and fixed-bid oversight for enterprise accounts.

- Grew the Prologis account from **5 people in Pakistan to 25 across Pakistan, India, and the US**, driven by delivery quality and client-facing proofs-of-concept.
- Led the Tickets.com (MLB) fixed-bid rebuild of a Flash-based, deprecation-risk venue and ticketing system, delivered to production within the **agreed 8-month timeline**.
- Ran technical trainings across stacks, planned engineer upskilling paths into billable roles, and worked on pre-sales technical analysis and RFP scoping across US and Pakistan teams.

NISUM

Pakistan

Technical Lead

04/2022 – 03/2023

- Owned delivery planning and software architecture decisions across Tickets.com rebuild, aligning implementation with client requirements.
- Led client facing delivery with the team of 9 members with an scrum methodology, ensuring smooth delivery, transparency and quality.
- Ran technical trainings on full-stack development and evaluated POCs to introduce new technologies into client-ready use.

NISUM

Pakistan

Principal Software Engineer

04/2021 – 03/2022

- Delivered the POC for Zingly.ai **in two months** timeline with a team of 3 developers, that helped Zingly meet the timeline for investor demo and raise the seed funding of **\$900K**.
- Led technical direction on the Tickets.com engagement from its earliest stage, applying software architecture and technical leadership.
- Trained team members on full-stack development practices, supporting code reviews, release management, and design patterns.

TECHLOGIX

Karachi, Pakistan

Principal Software Engineer

07/2018 – 04/2021

Techlogix is an enterprise technology solutions provider focused on financial services, banking, and business process automation.

- Delivered **6-8 platform releases per quarter** across TmX-Finance while coordinating banking, lending, and trade finance requirements.
- Mapped and lead the implementation of **8 new clients** on TmX finance including microfinance and commercial banks from Middle East and Pakistan.
- Developed a scalable integration platform and supported integration with **5 core-banking and contract management systems**.

- Aligned Tmx-Finance product design with banking, loan management, anti-money-laundering, remittance processing, and microfinance workflows.
- Owned project timelines end-to-end, managing risk and escalating early to keep delivery on schedule across a geographically distributed team.

NETSOL TECHNOLOGIES

Software Engineer

Karachi, Pakistan

02/2015 – 07/2018

NETSOL Technologies is a global provider of leasing and asset finance software for the automotive and equipment finance industries.

- Conducted and recorded organization-wide technical training on Angular 4 with **25 attendees** to lay the baseline for product upgrade of Netsol Financial Suite to a modern web stack.
- Received multiple recognitions within the organization for the delivery quality and speed. Resolved **15-20** high-impact product bugs per sprint (team average was 5-6)
- Developed Version 2 of the NETSOL Financial Suite using .NET MVC, WPF, and AngularJS.
- Built Ascent 2.0, a complete migration of the NETSOL Financial Suite to .NET Web API, ReactJS, and AngularJS.
- **Supported on-site UAT and migration** of Netsol Financial Suite for Investec Bank UK.

KEY PROJECTS

- **ADA (Albertsons Digital Assistant)** — Agentic AI assistant; 80% fewer cross-team dependencies. See Nisum, Senior Technical Lead.
- **Zapbook** — Venue booking platform rebuilt to production in 63 days. See SociiLabs, Co-Founder.
- **Zapbot** — AI booking assistant extending Zapbook support to 24/7. See SociiLabs, Co-Founder.
- **Prophic AI** — Pre-sales copilot pricing client briefs in minutes. See SociiLabs, Co-Founder.
- **HELM** — Two-sided hospitality-services marketplace, built end-to-end. See SociiLabs, Co-Founder.
- **SociiOS** — Internal AI-native SDLC framework across Claude, Cursor, and Slack. See SociiLabs, Co-Founder.
- **TmX-Finance** — Configurable financial platform spanning banking, AML, and microfinance. See Techlogix, Principal Software Engineer.
- **Ascent 2.0** — Full migration of the NETSOL Financial Suite to .NET WebAPI and React. See NETSOL, Software Engineer.

EDUCATION

Bachelor of Computer and Information Systems Engineering

NED University of Engineering and Technology, Karachi, Pakistan | 2011 – 2014
